

Cooling Your Daily Life®

Benefits

- · Heavy duty design with high corrosion resistance
- Favorable capacity/footprint ratio
- · Available with easily cleanable industrial fins
- · Reliable performance, Eurovent Certified
- · Easy installation & maintenance
- · Energy efficient: low total cost of ownership
- Two-year product guarantee
- Easy access to additional on-line product information

General information and application

The VXX3 series is a wide range of heavy-duty V-type dry coolers, based on modular design and optimized to achieve the best balance between environment, economy and performance.

VXX3 is specially designed for very high capacity on small footprint. The tube configuration is designed to work in a perfect harmony with modern environmentally friendly brine refrigerants in different applications such as data center cooling, air conditioning, process, refrigeration and industrial cooling.

The wide range of EC fans and control systems make it suitable for both silent operation in residential areas and maximized performance in industrial areas.

Refrigerant

Glycol

Capacity range (EN 1048)

200 kW up to 2 MW

Finned coil

The coil design provides excellent heat transfer. Fitted with copper tubing and aluminium fins. Standard fin spacing 2.1 and 2.4 mm.

Construction

Frame construction prevents vibration and allows thermal expansion. Galvanized steel casing, powder coated RAL 7045. Corrosion class C4-H.

Fan motors

High efficiency AC or EC fan motors, available in different fan diameters (910 and 1,000 mm) and noise levels. AC fans power supply 400 V/50 Hz/3 ph, protection class IP54. EC fans power supply 380-480 V/50-60 Hz/3 ph, protection class IP55. Motors are electrically connected to standard LSS – lockable service switches.

Design pressure

Design pressure 10 bar. Each heat exchanger is leak tested with dry air.

Selection

Selection and pricing is to be performed with our air heat exchanger selection software AiaCalc.

Selection output includes all relevant technical data and dimensional drawings.

Certifications

The AIA LU-VE quality system is in accordance with ISO 9001. All products are manufactured according to PED regulations.

LU-VE Group participates in the ECP program for HE. Check ongoing validity of certificate*:

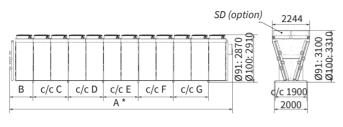

www.eurovent-certification.com

*Brine refrigerant is not covered by Eurovent certification

Options

- Coil corrosion protection:
 - Copper
 - Seawater resistant (AlMg)
 - Coated (ALU-Plus)
- Header cover (HC)
- Safety switch:
 - Lockable service switches with auxiliary contacts
 - Lockable service switches with auxiliary contacts wired to terminal (LSX+WAC)
 - Lockable service switches with auxiliary contacts wired to terminal in the cabinets ECC and JBS2 (LSX+WAC2)
- Connection box:
 - Enclosed motor control (CE)
 - Enclosed motor control with common junction box including main switch and MCB's (CE+JBS2)
- Fan sectioning (FS)
- Delivery cover for fins and coil (FP)
- Free pass with ladder left back (LBW)
- Free pass with ladder right front (RFW)
- Standard with ladder left front (LFS)
- Standard with ladder right back (RBS)
- Vibration dampers
- Flanged
- Whisperer
- Dri-Batic water spray system including tubes and nozzels pre-mounted from factory, up to 500 hours
- Dri-Batic water spray system kit and cabinet including filter, valves and pressure gauge, up to 500 hours (DB1)
